Outcome: Community members benefited from medical consultations and health check-ups. Awareness regarding preventive healthcare and healthy living practices increased. Students gained practical experience in community	
Description of the Event / Activity– The NSS Cell of Bengal College of Engineering & Technology (BCET), Durgapur organized a two-day Health Camp under the Care & Cure scheme on 19th and 20th November 2023 with the objective of promoting health awareness and providing basic healthcare services to members of the community. The programme was designed to create awareness regarding personal health, hygiene, preventive healthcare, and the importance of regular medical check-ups. The health camp was organized with the active support of the NSS Cell and local medical practitioners. A team of doctors and healthcare professionals participated in the programme and provided medical consultation and guidance to the beneficiaries. Approximately forty-two NSS volunteers actively participated in organizing and managing the camp, ensuring the smooth conduct of all activities. During the two-day programme, various general health check-ups and medical consultations were conducted. Participants were provided with basic health assessments and guidance regarding common health issues. The doctors interacted with the beneficiaries, addressed their concerns, and advised them on maintaining a healthy lifestyle and adopting preventive healthcare measures. NSS volunteers played a significant role throughout the programme. They assisted the medical team in participant registration, coordination, guiding visitors, maintaining records, and ensuring the smooth functioning of the camp. Their active involvement helped in the efficient	

management of the programme and facilitated better interaction between healthcare professionals and community members. Through this experience, students developed communication skills, teamwork, leadership qualities, and a deeper understanding of community service.

The health camp received an encouraging response from the participants. Several community members benefited from the health check-ups and medical consultations provided during the programme. Awareness regarding regular health monitoring, personal hygiene, preventive care, and healthy living practices was significantly enhanced among the beneficiaries. The initiative also strengthened the relationship between the institution and the local community by addressing an important social and healthcare need.

The programme concluded successfully with positive feedback from the participants and healthcare professionals. The **Health Camp 2023** served as a meaningful NSS initiative under the **Care & Cure** scheme, providing valuable healthcare support and awareness to the community while offering students an opportunity to contribute towards social welfare and community well-being.
